

# Compiling PCL from trunk Ubuntu 12.04 64bit Corei7 Cuda

Step 1. Download [PCL trunk source](#).

Step 2. Change Cmake file:

pcl-trunk → cmake → pcl\_find\_sse.cmake

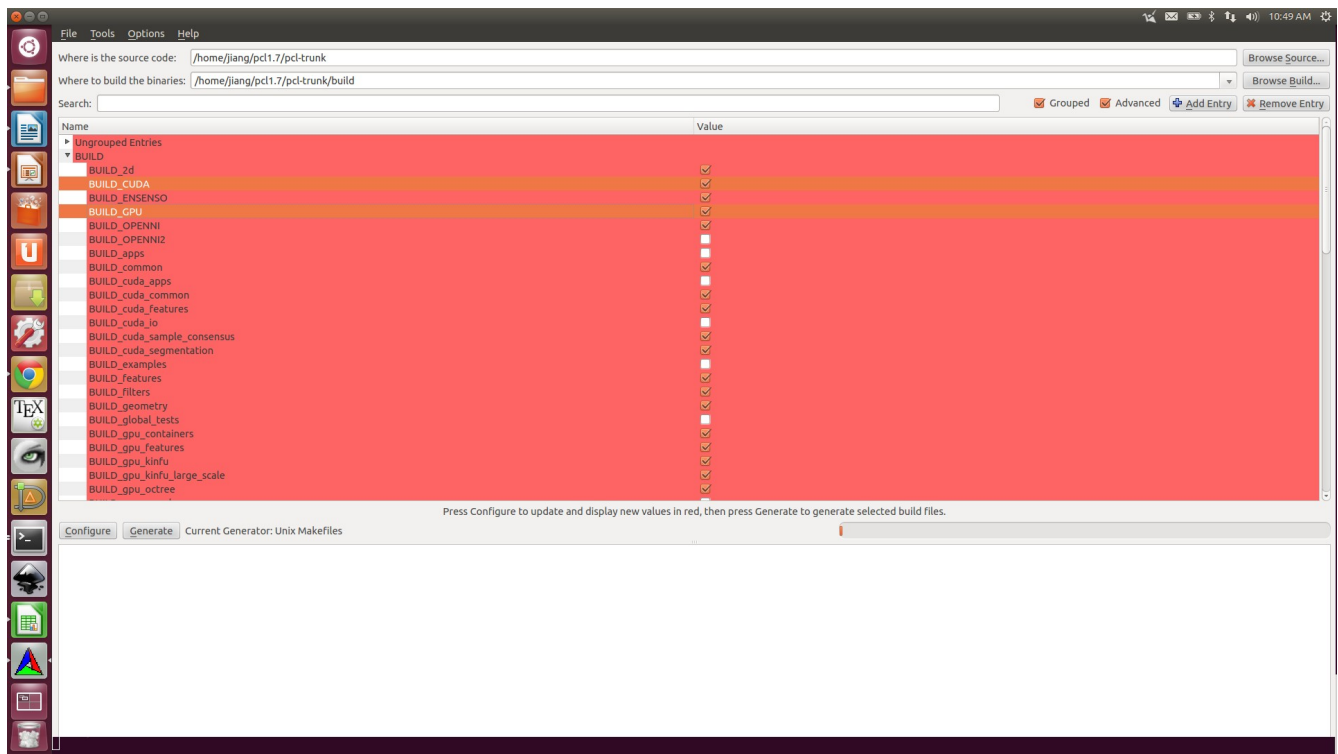

replace **"-march=native"** with **"-march=corei7"**

Step 3. Start compiling

```
$ cd ../pcl-trunk
```

```
$ mkdir build && cd build
```

```
# Run cmake-gui, configure and generate the build files.
```

```
$ make -j7
```

If no error happen, congrats!
